## WHAT IS COCHLEA?

A new non-fiction podcast from Newton's Dark Room. Host Talon Stradley is an audio recording student at Cal State Dominguez Hills. They say the best way to learn is to teach someone else, so Talon started this show. Each episode goes into a certain topic of sound, complete with examples. You'll learn about audio and Talon will be studying to pass his tests!

## WILL I LIKE COCHLEA?

If you have a curious mind and enjoy science, technology, physics, or music theory then you will likely enjoy Cochlea.

You do not need to be an audio expert to enjoy this show. We will be delving into more advanced topics, but our goal is always to make the information accessible. If you are willing to listen and learn, we're willing to teach.

## IS COCHLEA FOR KIDS?

Cochlea is 100% family friendly. Though the show deals with more advanced topics, the numerous examples and bite-sized delivery should be engaging for inquisitive kids.

## RELEASE SCHEDULE

New episodes are released whenever Talon learns something new and has time to make an episode. This show is meant to support his academic career and not detract from it. Because of that, we do not want to commit to a set release schedule.

Transcripts are available on the Newton's Dark Room website following every episode release.
